3. [Installation](#)
4. [How to activate the software?](#)
5. [How to contact Vyapin?](#)

What is Vyapin Office 365 Management Suite?

Vyapin Office 365 Management Suite is an Office 365 Reporting, Management and Migration Planning tool.

Office 365 Reports:

Vyapin Office 365 Reports is the most advanced reporting & analytics solution for Office 365 Administration, Governance & Planning.

The software provides more than 200+ reports ready to use without using PowerShell scripts. With automated and actionable reports straight to your Desktop, the truly multi-purpose solution offers unsurpassed customization and usability of its report data for collaboration and sharing, ensuring smooth and optimal functioning of your Office 365.

Office 365 Manager:

The software provides automated features for Office 365 License Management, User provisioning and deprovisioning in bulk, administration of Users, Groups, including Security groups and Distribution groups, and mailbox permissions management without using PowerShell scripts.

With complete audit trails for all administrative tasks, you can manage Office 365 straight from the Desktop in just a few clicks ensuring that the health and security of your Office 365 is never compromised.

Office 365 Migration Planning:

Office 365 Migration Planning is a reporting tool, that provides useful reports on Active Directory, Security and Permission for AD objects, Exchange Settings, Mailbox and other related information that helps user to analyse AD objects for Migration.

System Requirements

Disk space & Memory:

2 GB RAM and minimum of 75 MB of free disk space

Operating System (Only 64-bit operating system is supported):

Supported Windows client platform:

- I. Windows 10
- II. Windows 8.1
- III. Windows 8
- IV. Windows 7

Supported Windows server platform:

- I. Windows Server 2016
- II. Windows Server 2012
- III. Windows Server 2012 R2
- IV. Windows Server 2008
- V. Windows Server 2008 R2

Database:

The application by default creates its own Application database for data storage. However, you also have the option to store data in SQL server as given below:

- Microsoft SQL Server 2016
- Microsoft SQL Server 2012
- Microsoft SQL Server 2008

Software:

Office 365 Migration Planning module:

Remote Server Administration Tools (RSAT):

Refer the following [Microsoft article](#) to download, install and enable RSAT in the Windows Operating Systems.

Separate download links will be available for each client Operating System. No need to install separate package for server operating systems. Just enabling the feature from Windows Features is enough.

Other Modules (Office 365 Reports and Office 365 Manager):

- I. [Microsoft Online Services Sign-in Assistant](#)

Installation

Run the VyapinOffice365ManagementSuite_x64.msi. The setup wizard will guide you through the installation process.
